SHREYANSH SHARAN

Solution Architect & Engineering Manager | Data & AI Platforms | Databricks & Azure | DevOps

+91-XXXXX-XXXXX your.email@example.com linkedin.com/in/your-handle github.com/your-handle India

SUMMARY

Solution Architect and Engineering Manager with **8+ years** across analytics, data engineering, DevOps and Generative AI, delivering for **30+ enterprise clients** in Healthcare, Beverages, CPG/FMCG, Retail & Fashion, Pharma, Agrochemicals, Aviation, Financial Services and Construction Materials. Shipped an **ML platform to GA**, built an **Agent Registry solo** after two years of stalled attempts, and delivered a **two-phase data governance product** for a Fortune 500 US healthcare insurer. DevOps lead and the company's sole member of the core platform team for the **world's largest spirits company**, whose framework serves **1,000–2,000 developers across 7 verticals**. **Quarterly Impact Award in all four quarters** (FY25–26) and seven certifications in the year.

PRODUCT BUILT – OMNI STUDIO (POLESTAR ANALYTICS)

An AI data platform on Databricks: I designed the architecture and built the front end, back end and APIs. Five studios plus **Omni**, a page-aware `Ctrl+K` assistant.

- **Foundation Studio:** reads BRD and source-to-target documents and drafts a governed **medallion model** (SCD2 star schema), transformations and Databricks SQL, approved stage by stage.
- **Governance Studio:** scans jobs, clusters, SQL history and notebooks for column-level lineage, cost and LLM-spend budgets, access reviews and an audit log.
- **ML Studio:** business question to deployed model, with **Optuna** tuning, **MLflow** experiments, serving and drift monitoring.
- **Insights Studio:** semantic layer and knowledge graph with **AI-built dashboards** and NL-to-SQL over **Unity Catalog**.
- **Agent Studio:** agents with tools and **MCP** skills (one MCP server per studio), a live playground and full run traces.

EXPERIENCE

Polestar Analytics — 2021 – Present

Data, analytics and AI consultancy | India

Solution Architect & Engineering Manager – Data, DevOps & AI Products — 2025 – Present

- Architect and engineering manager for the platform product portfolio, with **every committed timeline met**: **MLOrion** (ML platform) shipped to **GA** on plan; the **Agent Registry**, stuck in planning for two years, built solo and delivered on schedule; a **User Management System** adopted by every product without rework; and the **Insight Portal**, self-service BI connecting directly to Power BI semantic models, sold as POCs to several clients.
- Delivered **Connected Governance** for a **Fortune 500 US healthcare insurer** in two on-time phases: estate-wide Databricks lineage, then the full **Lake Insight** platform (lineage, FinOps and audit-balance-control); the client bought Phase 2 after Phase 1.
- Architected an **enterprise Azure DevOps framework** for the **world's largest spirits company**, standardising CI/CD, branching, environment promotion and release governance across Databricks, ADF and Azure; the company's **sole member** of the client's DevOps and core platform teams, with zero escalations.
- Drove adoption across **7 verticals** (Supply, People, Legal, Finance, Customer, Consumer and more) for **1,000–2,000 developers**; cut release lead time from **3 days to under 2 hours**, failed deployments by **60%**, and new-project onboarding from **2 weeks to 2 days**.
- Weekly **1:1s** with every developer and technical hiring; led **pre-sales for 20+ opportunities** (CPG, FMCG, Financial Services), contributing to **8 client wins**.

Data Engineer & Platform Lead – Azure, Fabric & Databricks — 2024 – 2025

- Drove the **1Platform** portfolio: built **Datanexus** on Microsoft Fabric and Databricks, introduced **microservices** for Transformation V2, and proposed the architecture and LLD for **Agenthood**, building Agentbricks components on Databricks.
- Re-architected ingestion for a **global footwear and fashion retailer**: **500 files in 6 minutes** instead of 300+ (about **50**× faster), ending repeated SLA breaches.
- Built reusable accelerators (lineage API, ingestion framework, Power BI DevOps automation) and integrated the platform with MDM and OCR; the **lineage demo** helped win the healthcare insurer engagement.
- Built an **inventory intelligence platform** for one of the world's largest fertilizer companies: SAP data via **40+ ADF pipelines** into a Databricks medallion Lakehouse (**50M+ rows a day**) feeding ML stock rebalancing that cut stock-outs by **18%** and excess inventory by **12%**.
- Grew the spirits company engagement from a **3-month contract to multi-year**; completed the Microsoft partner programme audit; ran Databricks, MLOps, data science and streaming trainings.

Qlik Developer → Solution Architect → Administrator — 2021 – 2024

- Delivered Qlik and Azure solutions for **25–30 clients** in agrochemicals, aviation, biotech, automotive, fintech, cement, fuel retail and logistics automation: **150+ dashboards**, reload times cut by **40%**, multi-node Qlik Sense administration for **2,000+ users** and QlikView to Qlik Sense migrations.
- Grew a Qlik engagement with **one of the world's largest agrochemical companies** from a **3-month contract to 1.8 years** and into a full BI, data platform and governance SOW.
- **Took over the spirits company's DevOps programme during escalations** and delivered it on schedule; implemented CI/CD for a SaaS company and an Azure analytics infrastructure for another client.
- Led the **Microsoft Analytics Specialization** audit documentation to a **gap-free review**; built a Power BI DevOps asset and reusable **Terraform**, ADF and Synapse CI/CD templates.

Wipro Limited — 2018 – 2021

Pharmaceutical analytics practice | India

Qlik Solution Architect & Automation Engineer – Pharma Client 2 — 2020 – 2021

- Automated the full Qlik Sense delivery lifecycle (project creation, stream set-up, dashboard publishing and user-access management) using **Python and Selenium**.
- Turned a manual **2-day** provisioning process into a **30-minute** automated workflow, removing **80%** of manual administration effort and access-related errors.

Qlik Developer – Pharma Client 1 — 2018 – 2020

- Built **sales, insights and pharmacy performance dashboards** used by sales leadership and field teams; delivered **50+** dashboards and reports.
- Modelled sales, prescription and territory data; reduced report turnaround from days to same-day refreshes.

TECHNICAL SKILLS

Data & Cloud	Databricks (Lakehouse, Unity Catalog, Delta Lake, MLflow, Model Serving), Microsoft Fabric, PySpark, Azure Data Factory, ADLS Gen2, Azure Synapse, SAP data integration
DevOps	Azure DevOps (Repos, YAML Pipelines, Boards), CI/CD, Git branching, release governance, Terraform, Docker, Power BI DevOps
AI & ML	Claude, LLM agents, MCP, tool calling, RAG, NL-to-SQL, Mosaic AI, scikit-learn, Optuna, MLflow, forecasting
BI & Analytics	Qlik Sense, QlikView, Qlik administration (QMC/QRS), Power BI, semantic layers
Languages & Apps	Python, SQL, Spark SQL, FastAPI, microservices, REST APIs, full-stack web development, Selenium
Leadership	Engineering management, weekly 1:1s, technical hiring, pre-sales, training & enablement, partner audits

CERTIFICATIONS

- Claude Certified Solutions Architect | Anthropic
- Databricks Certified Data Engineer Professional | Databricks
- Databricks Certified Generative AI Engineer Associate | Databricks
- Databricks Solutions Architect | Databricks
- Azure Solutions Architect Expert (AZ-305) | Microsoft
- Azure DevOps Engineer Expert (AZ-400) | Microsoft
- Fabric Analytics Engineer Associate (DP-600) | Microsoft
- Azure AI Engineer Associate | Microsoft
- Azure Administrator Associate (AZ-104) | Microsoft
- Azure, Data & AI Fundamentals | Microsoft
- Qlik Certified Solution Architect | Qlik
- Qlik Certified Developer | Qlik

AWARDS & RECOGNITION

- **Quarterly Impact Award** in all four quarters (FY25–26) and direct recognition from the **CEO and CTO**, Polestar Analytics.
- **Above & Beyond Award** in every quarter (FY24–25), Polestar Analytics.
- **Most Innovative Award**, Wipro, for automating the Qlik delivery lifecycle with Python and Selenium.
- **Key Player, Pharmaceutical Vertical**, Wipro.
- **Best New Recruit 2018**, Wipro.

EDUCATION

Bachelor of Technology (B.Tech) — 2014 – 2018

Dr. B. R. Ambedkar National Institute of Technology (NIT) Jalandhar, Punjab, India
