SHREYANSH SHARAN

Solution Architect | Data & AI Platforms | Databricks & Azure | DevOps

+91-XXXXX-XXXXX your.email@example.com linkedin.com/in/your-handle github.com/your-handle India

SUMMARY

Solution Architect with **8+ years** across analytics, data engineering, DevOps and Generative AI. Designed and delivered solutions for **30+ enterprise clients** in Pharma, CPG/FMCG, Financial Services, Agriculture and Construction. Architected an enterprise DevOps framework for **Diageo** now used by **1,000–2,000 developers across 7 business verticals**, and built **Omni Studio**, a five-studio AI data platform on Databricks, end to end (front end, back end and APIs). Certified across Anthropic Claude, Databricks, Microsoft Azure and Qlik; active in pre-sales, solution design and mentoring.

PRODUCT BUILT – OMNI STUDIO (POLESTAR ANALYTICS)

An AI data platform on Databricks. I designed the architecture and built the front end, back end and APIs. It is made up of five studios plus **Omni**, a page-aware ⌨ `Ctrl+K` assistant available across the platform.

- **Foundation Studio:** an AI builder that reads client BRD and source-to-target mapping documents and drafts a governed **medallion model** (Bronze, Silver, Gold star schema with SCD2), its transformations and deterministic **Databricks SQL**. Each stage is approved by a person, then deployed through a 9-step onboarding wizard.
- **Governance Studio:** a control plane that scans Databricks jobs, clusters, SQL history and notebooks (12 collection targets) and covers column-level lineage, cost and LLM-spend budgets, right-sizing recommendations, access reviews and an immutable audit log.
- **ML Studio:** takes a business question to a deployed model: problem framing, a sandboxed guided notebook with **Optuna** tuning, **MLflow** experiments, champion models, deployment to Databricks serving, and drift monitoring.
- **Insights Studio:** a semantic layer (tables, knowledge graph, glossary, governed metrics and data-quality rules) with **AI-built dashboards**, “ask why” insights and natural-language-to-SQL over **Unity Catalog**.
- **Agent Studio:** agents with models, tools and **MCP** skills (one MCP server per studio), a live playground and full run traces, making the whole platform callable by agents.

EXPERIENCE

Polestar Analytics — 2021 – Present

Data, analytics and AI consultancy | India

Solution Architect – Data, DevOps & AI Products — 2025 – Present

- Architected an **enterprise Azure DevOps framework for Diageo**, the world’s largest spirits and whisky company, standardising CI/CD, branching, environment promotion and release governance for data workloads across Databricks, ADF and Azure.
- Drove adoption across **7 verticals** (Supply, People, Legal, Finance, Customer, Consumer and more), with the framework now used by **1,000–2,000 internal and vendor developers**; cut release lead time from **3 days to under 2 hours** and failed deployments by **60%**.
- Built reusable pipeline templates, quality gates and automated environment set-up, reducing onboarding of a new project to the framework from **2 weeks to 2 days**.
- Led **pre-sales for 20+ opportunities** across CPG, FMCG and Financial Services: discovery calls, solution architecture, effort estimates and demos, contributing to **8 client wins**.
- Authored target architectures for data engineering, infrastructure and **cloud migration** programmes (on-premises and legacy BI to Azure and Databricks Lakehouse).

Data Engineer – Azure & Databricks — 2024 – 2025

- Built an **inventory intelligence platform** for one of the world’s largest fertilizer companies: SAP data ingested through **Azure Data Factory** into a **Databricks** medallion Lakehouse (Bronze/Silver/Gold), feeding ML demand and stock models and dashboards.
- Delivered ML-driven stock rebalancing used by inventory managers and leadership, reducing stock-outs by **18%** and excess inventory holding by **12%** across distribution sites.
- Developed **40+ parameterised ADF pipelines** and PySpark jobs processing **50M+ rows daily** from SAP (ECC/S4) and other source systems, with incremental loads and data-quality checks.
- Delivered data engineering for Financial Services and CPG clients and for one of the world’s largest construction companies; tuned Spark workloads to cut job run time by **35%**.

Qlik Developer → Solution Architect → Administrator — 2021 – 2024

- Delivered Qlik solutions for **25–30 clients** across multiple domains as developer, solution architect and platform administrator.

- Built **150+ dashboards** in Qlik Sense and QlikView covering sales, finance, supply chain and operations; optimised data models to cut reload times by **40%**.
- Administered multi-node Qlik Sense environments for **2,000+ users**: security rules, streams, licences, task scheduling and upgrades.
- Led QlikView to Qlik Sense migrations and mentored junior developers on data modelling and set analysis.

Wipro Limited
2018 – 2021

Pharmaceutical analytics practice | India

Qlik Solution Architect & Automation Engineer – Pharma Client 2
2020 – 2021

- Automated the full Qlik Sense delivery lifecycle (project creation, stream set-up, dashboard publishing and user-access management) using **Python and Selenium**.
- Turned a manual **2-day** provisioning process into a **30-minute** automated workflow, removing **80%** of manual administration effort and access-related errors.
- Designed the solution architecture and governance model for the client's Qlik platform.

Qlik Developer – Pharma Client 1
2018 – 2020

- Built **sales, insights and pharmacy performance dashboards** used by sales leadership and field teams; delivered **50+** dashboards and reports.
- Modelled sales, prescription and territory data; reduced report turnaround from days to same-day refreshes.

TECHNICAL SKILLS

Data & Cloud	Databricks (Lakehouse, Unity Catalog, Delta Lake, MLflow, Model Serving), PySpark, Azure Data Factory, ADLS Gen2, Azure Synapse, Key Vault, SAP data integration
DevOps	Azure DevOps (Repos, YAML Pipelines, Boards), CI/CD, Git branching strategy, release governance, environment promotion, IaC templates
Generative AI	Claude, LLM agents, Model Context Protocol (MCP), tool calling, RAG, NL-to-SQL, Databricks Mosaic AI, Azure AI services
ML	Feature engineering, scikit-learn, Optuna, MLflow, forecasting & recommendation models
BI & Analytics	Qlik Sense, QlikView, Qlik administration (QMC/QRS), Power BI, semantic layers
Languages & Apps	Python, SQL, Spark SQL, REST APIs, full-stack web development, Selenium automation

CERTIFICATIONS

- Claude Certified Solutions Architect | Anthropic
- Databricks Certified Generative AI Engineer Associate | Databricks
- Databricks Certified Data Engineer | Databricks
- Databricks Solutions Architect | Databricks
- Microsoft Certified: Azure Solutions Architect Expert | Microsoft
- Microsoft Certified: Azure AI Engineer Associate | Microsoft
- Qlik Certified Solution Architect | Qlik
- Qlik Certified Developer | Qlik

AWARDS & RECOGNITION

- **Most Innovative Award**, Wipro, for automating the Qlik delivery lifecycle with Python and Selenium.
- **Key Player, Pharmaceutical Vertical**, Wipro.
- **Best New Recruit 2018**, Wipro.

EDUCATION

Bachelor of Technology (B.Tech)
2014 – 2018

Dr. B. R. Ambedkar National Institute of Technology (NIT) Jalandhar, Punjab, India
